

DAR-KAY ENTERPRISES LTD.

ALL ABOUT DAR-KAI

Here at Dar-Kai Enterprises Ltd. we take pride in our business relationships with our clients. Our goal is to be the preferred choice of oil and gas producers for their valve servicing needs. We ensure that our staff understands this goal as we work towards continually improving the effectiveness of our service, to meet our customers' expectations by accommodating their needs.

Constantly watching the pulse of the Industry, we at Dar-Kai Enterprises Ltd. have created a program called **V-Trax** to manage all our safety, employees, maintenance and valve related materials. Our software is capable of tracking and managing all data pertaining to your valves. Our highly trained staff enter information on site about the valves and service done to them. We can then instantly search with 16 different parameters to supply any information that you require. In addition to reports, we also aggregate the data to show statistics and charts pertinent to our work for you. Using this information, we can see problem areas and make valve suggestions for different circumstances. I.e. if a particular sour field is causing shortened life on a certain manufacturer's valves. Due to the success of the application, we have added valve tracking. We can come to your plant, catalogue all valves and give you an accurate and thorough servicing quote along with a master list of all your valves. We feel that all of these capabilities give our customer a value added service and give us an edge on our competition. Currently we have tracked in our system 134,000 serviced valves and over 1700 commissioned for 80+ companies.

ALL ABOUT DAR-KAI

Safety and compliance is of the utmost importance to Dar-Kai which is why we are registered with **ComplyWorks**, **ISNetworld**, hold a **COR certificate** and are in good standing with **WCB**. As it stands, Dar-Kai has an **ISO 9001:2015** registration with the **DNV – Business Assurance**. To maintain this, our procedures and quality management system are externally audited by qualified auditors annually (see attached registration certificate). All of Dar-Kai Enterprises Valve Technicians are **Valve-pro Certified** through the **University of Texas** and we have a management team with over 50 years combined oilfield experience. We pride ourselves in going above and beyond what is required so that we can offer our clients the safest, most efficient product/service as well as maintaining an environmentally friendly atmosphere. Our objective is to continually position ourselves to be leading the Industry, not catching up. We successfully achieve this through many avenues, the most important one being the input of our clients. The programs we have developed throughout the years are consistently getting better due to feedback and comments made. We make it a priority to hear the voices of our clients as it is they who make us stronger. Customer satisfaction is always the objective.

With hard work, and determination to be set apart in our Industry, we have built a reputation that carries such ideals such as efficiency, upstanding work ethic, qualified technicians, advanced safety programs and a management team that cares for its employees and continually implements systems to keep propelling us forward. Over the years we have been used of our clients to help in various situations that involve valves, anything from fatality investigations to AER audits. We have good working relationship with many valve manufacturers including; Argus, Jag, KF and Cameron (which includes Grove, WKM and Nutron), as well as valve distributors such as; NOV, Apex, AIV, GRM Flow Products, Circor Energy and Sterling Automation.
